

PRODUCT RE-INTRODUCTION

MP2800

What were YOU doing in 2005?

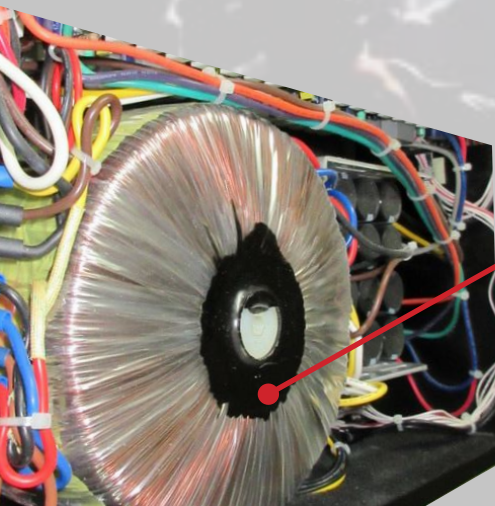

In 2005, we were busy launching the MP2800 Power amplifier!

For over 13 years the Wharfedale Pro MP2800 has been used by customers around the world who stretch it to its limits. Pushed to the limits of extreme heat, poor ventilation, shocking vibration and surviving in incredible levels of dust, and irregular AC conditions, MP2800 has proved itself as truly reliable.

Its massive toroidal transformer fills over a third of the internal casing and ensures smooth power stability in almost any AC situation..

It may not be the prettiest, it may not be the lightest, it may not be the most technologically advanced but, like a favourite hammer, its a tool to rely on. **See you next year!**

- ✓ Not pretty - Its built for function
- ✓ No technology - Its easy to repair
- ✓ Not light - massive toroidal transformer
- ✓ **MP2800 is simply EXTREMELY reliable**

A the heart of the MP2800 is the massive toroidal transformer which delivers unsurpassed AC stability.

Model Name	MP2800
Output	
Stereo 2Ω	1500w x 2
Stereo 4Ω	1400w x 2
Stereo 8Ω	800w x 2
Bridged Mono mode	
Mono 8Ω	2800w
Mono 4Ω	3000w
Inputs	XLR x 2
	6.3mm jack x 2
Outputs	Posts & speakON
Topology	Class H
Controls	AC Switch
	Ch1, Ch2 gain knobs
	Stereo / Bridge mode switch
Dimensions	133mm x 483mm x 335mm
Net weight	28.0Kg !!
Gross weight	29.5Kg
